BRAKE SHOE KITS

Brake Shoe Kits are crucial components in a truck's braking system. To deliver the most reliable performance and longevity, a Brake Shoe Kit must be manufactured to OE quality standards. The shoe must have the precise carbon content in steel to deliver adequate stiffness. A top Brake Lining must have the best balance between braking response and wear. When a Brake Shoe Kit is manufactured under a level 3 PPAP, it is equivalent to OE production, guaranteeing the same level of quality. The Alliance Brake Shoe Kits are PPAPed to OE specs.

Brakes are one of the most vital parts on your truck and one area where you never want to compromise. You want to feel confident about the parts stopping your rig. Alliance Truck Parts offers a great range of brake drums, brake shoes & kits, spring brakes & chambers designed to provide a safe, dependable operation. Featuring rugged construction and quality components to reduce corrosion and equipment failure, you can rely on Alliance brakes to deliver. Alliance Brake Shoe Kits are PPAPed (Production Part Approval Process) to OE specs and manufactured by reputable OE suppliers to deliver the most reliable performance and longevity.
