The Best HD shock on the market is Gabriel's FleetLine® heavy duty commercial vehicle shock!

As a proven industry-preferred leader, FleetLine® Heavy Duty Shocks by Gabriel offer several advantages including best-in-class fade performance, greater energy absorbing hydraulic stop, superior anti-corrosion end mounts, and many more! Unlike most competitors' shocks, FleetLine® has PROVEN performance for over 60 years in the Commercial Vehicle OE and aftermarket. FleetLine® offers a full line of All-Makes coverage for Classes 3 through 8 trucks, trailers and buses, including suspension shocks, cab shocks, and steering stabilizers.

Pro Tips: Signs that you need new windshield wipers

Deteriorated wipers produce an uneven wipe, which prevents proper contact with the windshield surface. This will create unwiped or streaky areas, severely impairing your driving vision. If any of the conditions below describe your wipers, replace them today:

Streaking

Caused by dry rubber that has hardened and cracked. Streaking can also be caused by tree sap, road tar and other foreign substances on the blade rubber.

Chattering

Caused by the "permanent set" or "curve" in the rubber that some wiper blades develop while they are not being used. This condition is characterised by the chattering sound the blade makes as it passes across the windshield.

Worn Rubber

General rounding of the wiping edge caused by age.

Split Rubber

A condition found on blades that are old, or may be due to the effects of the sun's ultraviolet rays on the rubber.

Bent Refill or Wiper Frame

Sometimes caused by automatic car washes or vandalism.
